Plan to outrank our competitors

MacBook Repair Dubai · 21 October 2026

Built from the rank audit of 19 October:

- live Google check of 23 MacBook keywords
- Search Console (last 28 days)
- Semrush competitor positions (26 Sep)
- the image audit

Evidence: War Room report `rank-reasons-2026-10-19`. Team brief: team-brief-videos-photos-2026-10-21.md.

Where we stand today

	Us	Best competitor
Map pack, 23 MacBook searches	shown on 13, average #2.3, never #1	MacBook Repair Specialist Dubai: #1 on 23 of 23
Google reviews	242 (5.0)	310 (4.9)
Normal results, #1 spots (23 searches)	2	mactechpro.ae: 9
Normal results, top 3 (23 searches)	16	mactechpro.ae: 16
Sites that link to competitors and also to us	0 of 500	fixsquad, geeks, fixermanme: hundreds each
Videos in Google's video row	0	YouTube repair channels fill it
Repair photos ranking in Google Images	images around #52 for "macbook repair"	old banners from macbookrepairsdubai.ae, fixsquad
Search Console (28 days)	993 clicks, 170K impressions, average position 7.2	—

About "10x"

Nobody can promise 10 times a competitor's rankings. What we *can* do is be far ahead on the things Google rewards and competitors don't do:

- 20+ real repair videos
- 75+ real bench photos
- steady new reviews that name the repair
- clean links earned on merit

The targets below are measurable, and we check them every month.

Target	In 90 days (by 20 Jan 2027)	In 6 months (by 20 Apr 2027)
Map pack, 23 MacBook searches	shown on all 23, #1 on 5+	#1 on 12+
Google reviews	300+	380+
#1 in normal results (23 searches)	8+	15+
Search Console clicks (28 days)	2x (about 2,000)	3–4x (3,000–4,000)
Videos live on YouTube + website	12	21
Real photos on money pages	40	75+
Clean sites linking to us	+15	+40

The five pillars

1. Map pack (the biggest gap)

Why we lose: fewer reviews than the #1 listing, the shop is about 20 km from central Dubai, and our listing doesn't list any repair services.

- **Reviews (team, every day).** Ask every finished customer: a QR code at the counter, plus a WhatsApp link within 24 hours. Ask them to name the repair. We need about 20 a month to pass 310 by January. Reply to every review. (War Room t16, urgent)
- **Business Profile services (owner, this week).** Add each MacBook repair as a service with a short description: screen, battery, keyboard, logic board, liquid damage, data recovery, charging port, overheating. (t-rank-gbp-services)
- **Business Profile activity (office, weekly).**
  - the 3 best new bench photos
  - every new video
  - one post about a real repair from that week
  - answers in the Q&A section
- **Same details everywhere.** Fix the conflicting name/address/phone on macbookrepair.ae, the Facebook page and azizitechnologies.ae. (t-nap-conflicts)
- **Area tracking.** A map-grid rank tracker around Media City (Semrush Map Rank Tracker once access is renewed, or BrightLocal). This is the only way to see positions area by area. (t18)

2. Authority (links and trust)

- **Decide D3:** azizitechnologies.ae competes with us on 16 of 23 searches. Consolidate or split cleanly; until then link work is split between two sites.
- **Decide D14:** spam links. Never buy links again.
- **Citations, 10 a month (owner sends, Claude drafts):**
  - UAE directories with identical name, address and phone
  - Bing Places
  - Apple Business Connect
  - the 6 drafts already in automation/drafts/

(t17, t-send-outreach)

- **Earned links (Claude finds and drafts, owner sends).** From the 500 sites that link to competitors but not us, keep the genuine UAE and tech sites and request a listing or mention. (t-rank-backlink-gap)
- **Our own data as a story.** A short "Dubai summer and your MacBook" report built from our real repair logs (battery swelling, fan failures, liquid damage by month), offered to UAE tech and lifestyle sites. Only numbers from our own records. This is the kind of link competitors can't copy.

3. Pages (win #1 from mactechpro.ae)

- **Deploy what's waiting.** These are built but not live:
  - homepage share image + image sitemap (e13e607)
  - review count 242 (03ff595)
  - the rank-audit data
- **Sharpen the MacBook money pages** (homepage, screen, battery, keyboard, logic board, water damage). Additive only on protected pages:
  - an answer-first block naming the repair and the real turnaround
  - first-hand bench detail
  - the real photos
  - the video, with VideoObject markup

(t-rank-money-page-sharpen)

- **Data recovery:** merge our two competing pages into one strong page with a 301. (t-rank-data-recovery)
- **Screen pages:** finish consolidating the MacBook screen pages. (t-screen-consolidate)
- **Images:**
  - one image per service page instead of one image on 70 pages
  - never rename an image file again; replace it in place

(t-rank-image-dedupe)

- **Prices:** about 8,000 impressions a month are "cost" searches where we sit at #3–5 and get almost no clicks. The separate prices session (POS invoices) decides whether real price ranges go on the site. If you approve them, these searches are the fastest click win.

4. Videos and photos

The topics are in the team brief: 21 videos and 75 photos, all mapped to searches we already get. When a video arrives, Claude:

1. writes the YouTube title, description (with address, phone and hours from the fact sheet), chapters and tags
2. cuts the 30–60 second vertical version (Remotion project) for Shorts, TikTok and Instagram
3. embeds the video on the matching page, with VideoObject markup and a short written summary under it
4. adds the 3 job photos to that page with descriptive file names, alt text and captions, and lists them in the image sitemap
5. posts the video and photos to the Business Profile (owner approves)

Channel: decide which YouTube channel to use. The site currently links @AziziTechnologies, so this ties into decision D3.

Video	Page it goes on
1 Screen replacement	/macbook-screen-repair-dubai/ (protected, additive)
2 Horizontal lines	/white-or-grey-horizontal-lines-appearing-on-macbook-screen/
3 Battery	/macbook-battery-replacement-dubai/
4 Swollen battery	/macbook-battery-swollen-repair-dubai/
5 Liquid damage	/macbook-water-damage-repair-dubai/
6 Logic board	/macbook-logic-board-repair-dubai/
7 Not turning on	/macbook-not-turning-on-dubai/
8 Keyboard	/macbook-keyboard-repair-dubai/
9 Overheating	/macbook-overheating-fix-dubai/
10 Data recovery	/macbook-data-recovery-dubai/ (after the merge)
11 Flexgate	/macbook-flexgate-repair-dubai/
12 Charging port	/macbook-charging-port-repair-dubai/
13 iPad battery	/ipad-battery-replacement-dubai/
14 iPad screen	/ipad-screen-repair-dubai/
15 iPad water damage	/ipad-water-damage-repair-dubai/
16 iPhone 16 flicker	/iphone-screen-repair-dubai/
17 iPhone shock while charging	the page that already ranks for it (check in Search Console first)
18 iPhone screen	/iphone-screen-repair-dubai/
19 iPhone battery	/iphone-battery-replacement-dubai/
20 Walk to the workshop	/contact/ and the Business Profile
21 Meet the team	/about/

5. Measure (every week, and adjust)

- **Monday report** (autopilot job j06):
  - Search Console clicks, impressions and position for the 23 tracked keywords
  - new reviews
  - videos and photos received and published
- **Monthly:**
  - live check of the 23 keywords
  - map-grid scan (once a tracker is connected)
  - competitor review counts
- **If a pillar isn't moving after 6 weeks,** we change the tactic, not the target.

Timeline

When	Owner (you)	Team	Claude
This week	Say "deploy". Add the Business Profile services. Start review requests. Answer D3 and D14.	Read the brief; film videos 1–2; photos for screen and battery	Deploy; draft citation requests; set up the video and photo publishing steps
Weeks 2–6	Send 10 citations a month. Approve Business Profile posts.	2 videos a week (topics 1–12); photos for every job	Publish each video and photo set; sharpen the money pages; data recovery merge; image cleanup
Weeks 7–12	Renew Semrush or connect a grid tracker. Pitch the Dubai heat data story.	Videos 13–21	iPad/iPhone pages; links from the competitor gap; 90-day review against the targets
Months 4–6	Keep reviews and links going	Monthly new videos for new faults and new models	Keep tracking, fix what lags, add new topics from Search Console

Decisions only you can make

	Decision	Why it matters
D3	azizitechnologies.ae: consolidate or split	It competes with us on 16 of 23 searches and splits links and clicks
D14	Spam links: were any bought?	Settles how we treat the link profile
D6	"Fixed in 30 minutes or it's free" and other claims	Still on the site's default share image; unproven claims must come off
Prices	Show real price ranges from the POS invoices?	About 8K cost searches a month
Channel	Which YouTube channel hosts the videos	Videos need one home
Deploy	Say "deploy"	Three finished improvements are waiting
